

# Make a Spider

## What You Need:

- paint or markers
- four craft sticks
- glue
- colored paper
- scissors
- googly eyes

## What You Do:

1. Paint or color the craft sticks.
2. To make the spider's legs, glue one stick on top of another. It should look like an X. Repeat until all sticks are glued together.
3. Cut a circle from the paper. This is the body. Glue it where all the sticks cross. Then glue googly eyes to the paper.
